

1 UNITED STATES COURT OF APPEALS

2  
3 FOR THE SECOND CIRCUIT

4  
5 August Term, 2004

6  
7  
8 (Argued: December 6, 2004 Decided: April 14, 2005)

9  
10 Docket No. 04-0366-cv

11  
12 - - - - -x

13  
14 GREEN MOUNTAIN RAILROAD CORPORATION,

15  
16 Plaintiff-Appellee,

17  
18 - v.-

19  
20 STATE OF VERMONT, VERMONT AGENCY OF  
21 NATURAL RESOURCES and WILLIAM H.  
22 SORRELL, as Attorney General of the  
23 State of Vermont,

24  
25 Defendants-Appellants.

26  
27 - - - - -x

28 Before: CARDAMONE, JACOBS, CABRANES, Circuit Judges.

29  
30 The State of Vermont, its Agency of Natural Resources  
31 and the State Attorney General appeal from a judgment  
32 entered in the United States District Court for the District  
33 of Vermont (Murtha, J.), holding that Vermont's  
34 environmental land use statute cannot impose pre-  
35 construction permit requirements on proposed railroad  
36 transloading facilities, on the ground that the Vermont  
37 statute is preempted by the Interstate Commerce Commission

1 Termination Act of 1995, 49 U.S.C. § 10101 et seq. We  
2 affirm.

3  
4 JEANNE ELIAS, Assistant Attorney  
5 General for the State of  
6 Vermont, (Rebecca M. Ellis,  
7 Bridget Asay, Assistant  
8 Attorneys General, on the brief)  
9 Montpelier, VT, for Defendants-  
10 Appellants.\_\_\_\_\_

11  
12 ROBERT B. LUCE, (Eric A.  
13 Poehlmann, on the brief) Downs  
14 Rachlin Martin PLLC, Burlington,  
15 VT, for Plaintiff-Appellee.

16  
17 EVELYN G. KITAY (Ellen D.  
18 Hanson, General Counsel, on the  
19 brief) Washington, D.C. for  
20 Amicus Curiae Surface  
21 Transportation Board.

22  
23 Robert M. Jenkins III, David M.  
24 Gossett, Mayer Brown Rowe & Maw  
25 LLP, Washington D.C.; Louis P.  
26 Warchot, Dennis J. Starks,  
27 Association of American  
28 Railroads, Washington, D.C.;  
29 George A. Aspatore, Sarah J.  
30 Bailiff, Paul Guthrie, Thomas J.  
31 Healey, Paul R. Hitchcock,  
32 Theodore K. Kalick, Robert T.  
33 Opal, Louise Anne Rinn, Peter J.  
34 Shudtz, Sidney L. Strickland,  
35 Jr., of Counsel, on submission,  
36 for Amicus Curiae Association of  
37 American Railroads.

38  
39  
40  
41 DENNIS JACOBS, Circuit Judge:

1           Green Mountain Railroad Corporation ("Green Mountain")  
2 proposed to build transloading facilities on its property in  
3 Vermont, and brings this action seeking a declaration that  
4 Vermont's environmental land use statute, Act 250, Vt. Stat.  
5 Ann. Tit. 10, § 6001 et seq., is for that purpose preempted  
6 by the Interstate Commerce Commission Termination Act of  
7 1995, 49 U.S.C. § 10101 et seq. (the "Termination Act").  
8 The State of Vermont, its Agency of Natural Resources and  
9 the State Attorney General appeal from a judgment entered in  
10 the United States District Court for the District of Vermont  
11 (Murtha, J.), granting Green Mountain's motion for summary  
12 judgment on the preemption ground. Green Mountain R.R.  
13 Corp. v. Vermont, No. 01-CV-181, 2003 U.S. Dist. LEXIS  
14 23774, at \*2-3 (D. Vt. Dec. 15, 2003).

15           The Termination Act expressly preempts "remedies  
16 provided under Federal or State law" and vests with the  
17 Surface Transportation Board (the "Transportation Board"), a  
18 federal agency, exclusive jurisdiction over "transportation  
19 by rail carriers" and "the construction . . . of . . .  
20 facilities . . . ." 49 U.S.C. § 10501(b). The term  
21 "transportation" includes a "warehouse . . . yard, property,  
22 facility, instrumentality, or equipment of any kind related

1 to the movement of passengers or property, or both, by  
2 rail.” 49 U.S.C. § 10102.

3 “We review a district court’s grant of summary judgment  
4 de novo.” See Young v. County of Fulton, 160 F.3d 899, 902  
5 (2d Cir. 1998). In so doing, we construe the evidence in  
6 the light most favorable to the State as the non-moving  
7 party, and draw all reasonable inferences in its favor. See  
8 Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255 (1986).  
9 For the reasons that follow, we affirm.

10  
11 **I**

12 Green Mountain is a “rail carrier” as defined by  
13 the Termination Act, 49 U.S.C. § 10102(5), with 52 miles of  
14 track between Rutland, Vermont and Cold River, New  
15 Hampshire. The line serves transshipping industries, i.e.,  
16 industries that rely on trucks to transport goods from the  
17 rail site for processing elsewhere. Along its rail line in  
18 Rockingham, Vermont, Green Mountain owns a 66-acre tract  
19 known as “Riverside,” bounded by the Connecticut River on  
20 the east. Portions of Riverside are wetlands unusable for  
21 development.

22 Green Mountain proposed to build facilities at

1 Riverside to serve the following operations: (1) unloading  
2 bulk salt arriving by rail for local distribution by truck  
3 or for temporary storage in a shed pending distribution; (2)  
4 temporary storage and transport of "non-bulk goods, such as  
5 steel pipe[s]"; and (3) unloading bulk cement arriving by  
6 rail for storage in silos and eventual transport by truck.  
7 Some of these operations are conducted within a 100-foot  
8 strip alongside the Green Mountain tracks and the  
9 Connecticut River.

10 Vermont argues that construction of the transloading  
11 facilities is subject to Act 250, an environmental land use  
12 statute that mandates preconstruction permits for land  
13 development. Permit applications are filed with one of nine  
14 District Commissions that evaluate environmental impact  
15 using ten criteria, including: "undue water or air  
16 pollution," Vt. Stat. Ann. Tit. 10, § 6086(a)(1), and "undue  
17 adverse effect on the scenic or natural beauty of the area,  
18 aesthetics, historic sites or rare and irreplaceable natural  
19 areas," Vt. Stat. Ann. Tit. 10, § 6086(a)(8). The District  
20 Commission's decisions are appealable to Vermont's  
21 Environmental Board; decisions of the Environmental Board  
22 are appealable directly to the Vermont Supreme Court. Vt.  
23 Stat. Ann. Tit. 10, § 6089(a) & (b). Most permit decisions

1 under Act 250 are issued within 60 days from the filing of  
2 an application.<sup>1</sup>

3 In 1997, PMI Lumber leased part of Riverside and  
4 applied for an Act 250 construction permit. PMI Lumber  
5 proposed to satisfy environmental criteria by a 75-foot  
6 buffer zone along the river. The Vermont Agency of Natural  
7 Resources recommended that the buffer be increased to 100  
8 feet.

9 A local permitting agency subsequently issued Land Use  
10 Permit #2W0038-2 (the "dash-2 permit") in the names of PMI  
11 Lumber and Green Mountain. Condition 14 required  
12 maintenance of a 100-foot buffer zone. When PMI Lumber  
13 ceased operations at the site, Green Mountain used it for  
14 its transloading activities. Green Mountain encroached on  
15 the buffer zone with a settling pond, storage of materials,  
16 and vehicles.

17 In Spring 1998, Green Mountain sought to amend the

---

<sup>1</sup> Green Mountain contends that this expedited schedule (as cited by the State) applies only to "minor" amendments to existing permits, whereas its proposal is likely to be treated as a "major" application. State statistics collected from January 1998 through December 2002 indicate that the average timetable for "major" permit applications was 303.39 days. More than half of landowner appeals of District Commission decisions to the Vermont Environmental board took more than nine months in 2001.

1 dash-2 permit to allow construction of a 100-foot by 275-  
2 foot salt storage shed. In January 1999, the State granted  
3 Land Use Permit #2W0038-3 (the "dash-3 permit"), which  
4 stipulated conditions, including that the shed be  
5 rectangular, and either brown or dark green. Several months  
6 later, in October 1999, Green Mountain applied for another  
7 permit amendment (the "dash-3B permit" application) to  
8 modify the size, color and location of the salt shed.  
9 Although no such permit issued, Green Mountain started  
10 construction of its modified salt shed in November 1999.

11 In January 2000, the State issued a notice of violation  
12 of the dash-2 permit, citing (among other things) storage of  
13 materials within the 100-foot buffer zone. The State issued  
14 a second notice of violation in February 2000, alleging  
15 construction of the salt shed without the dash-3B permit.

16 In Spring 2000, the State conducted hearings on Green  
17 Mountain's dash-3B salt shed permit application. Green  
18 Mountain objected orally and in writing that the State  
19 Environmental Commission lacked jurisdiction to adjudicate  
20 the pending permit application because the Termination Act,  
21 which expressly preempts "remedies provided under Federal or  
22 State law" and vests with the Transportation Board, a

1 federal agency, exclusive jurisdiction over "transportation  
2 by rail carriers," 49 U.S.C. § 10501, preempts Act 250.

3 Faced with the threatened enforcement of Act 250, Green  
4 Mountain filed this suit in June 2001, seeking a declaration  
5 that the Termination Act preempts Act 250. Simultaneously,  
6 Green Mountain requested a declaratory order to the same  
7 effect from the Transportation Board.

8 The Transportation Board denied the declaratory relief  
9 in May 2002, deferring to the district court. In the  
10 meantime, the State moved to dismiss the district court  
11 action. While that motion was pending, the State issued the  
12 dash-3B permit in August 2001. A month later, the district  
13 court granted the State's motion to dismiss Green Mountain's  
14 facial challenge to the applicability of Act 250, but  
15 ordered "further development of the record" to determine  
16 whether the State's "effort to enforce one or more  
17 conditions of the [dash-2] Permit violates the [Termination  
18 Act] in this particular case." Green Mountain R.R., No. 1:  
19 01CV181, 2003 U.S. Dist. LEXIS 23774, at \*2 (quoting an  
20 earlier ruling) (internal quotation marks omitted).

21 Following discovery, the parties cross-moved for  
22 summary judgment. On December 15, 2003, the court granted

1 Green Mountain's motion (and denied the State's motion) on  
2 the ground that "the state's efforts to enforce Act 250 in  
3 this case are preempted under the [Termination Act]." Id.  
4

## 5 II

6 The question presented is whether the Termination Act  
7 preempts Vermont's Act 250 with respect to the underlying  
8 permit controversy. State law is preempted by federal law  
9 when: (1) the preemptive intent is "'explicitly stated in [a  
10 federal] statute's language or implicitly contained in its  
11 structure and purpose'"; (2) state law "actually conflicts  
12 with federal law"; or (3) "federal law so thoroughly  
13 occupies a legislative field 'as to make reasonable the  
14 inference that Congress left no room for the States to  
15 supplement it.'" Cipollone v. Liggett Group, Inc., 505 U.S.  
16 504, 516 (1992) (quoting Jones v. Rath Packing Co., 430 U.S.  
17 519, 525 (1977), and Fidelity Fed. Sav. & Loan Ass'n v. De  
18 la Cuesta, 458 U.S. 141, 153 (1982)). The "ultimate touch-  
19 stone" of preemption analysis is congressional intent:  
20 "Congress' intent, of course, primarily is discerned from  
21 the language of the pre-emption statute and the statutory  
22 framework surrounding it." Medtronic, Inc. v. Lohr, 518

1 U.S. 470, 485-86 (1996) (internal quotation marks omitted).

2 The Termination Act contains an express preemption  
3 clause:

4 Except as otherwise provided in this part, the  
5 remedies provided under this part with respect to  
6 regulation of rail transportation are exclusive  
7 and preempt the remedies provided under Federal or  
8 State law.

9  
10 49 U.S.C. § 10501(b). The Termination Act Section 10501  
11 vests the Transportation Board with exclusive jurisdiction  
12 over "transportation by rail carriers" and "the  
13 construction, acquisition, operation, abandonment, or  
14 discontinuance of spur, industrial, team, switching, or side  
15 tracks, or facilities, even if the tracks are located, or  
16 intended to be located, entirely in one State." 49 U.S.C.  
17 § 10501(b). "Transportation" is expansively defined to  
18 include: "a locomotive, car, vehicle, vessel, warehouse . .  
19 . yard, property, facility, instrumentality, or equipment of  
20 any kind related to the movement of passengers or property,  
21 or both, by rail." 49 U.S.C. § 10102(9). Certainly, the  
22 plain language grants the Transportation Board wide  
23 authority over the transloading and storage facilities  
24 undertaken by Green Mountain. See City of Auburn v. United  
25 States, 154 F.3d 1025, 1029-31 (9th Cir. 1998); see also

1 R.R. Ventures, Inc. v. STB, 299 F.3d 523, 530 (6th Cir.  
2 2002) (“[I]f a railroad line falls within its jurisdiction,  
3 the [Transportation Board’s] authority over abandonment is  
4 both exclusive and plenary.”).

5 Other federal courts recognize that the Termination Act  
6 preempts most pre-construction permit requirements imposed  
7 by states and localities. See, e.g., City of Auburn, 154  
8 F.3d at 1030-31 (affirming the Transportation Board’s  
9 finding that the Termination Act preempted a local  
10 environmental permitting requirement); Soo Line R.R. Co. v.  
11 City of Minneapolis, 38 F. Supp. 2d 1096, 1101 (D. Minn.  
12 1998) (“The Court concludes that the City’s demolition  
13 permitting process upon which Defendants have relied to  
14 prevent [the railroad] from demolishing five buildings . . .  
15 that are related to the movement of property by rail is  
16 expressly preempted by the [Termination Act].”); CSX  
17 Transp., Inc. v. Ga. Pub. Serv. Comm’n, 944 F. Supp. 1573,  
18 1585 (N.D. Ga. 1996) (finding state regulation of railroad  
19 agency closing preempted by the Termination Act).

20 For example, the Ninth Circuit concluded, in affirming  
21 a Transportation Board decision, that the Termination Act  
22 preempted state and local environmental regulations

1 requiring a railway to submit to a permitting process before  
2 making repairs and improvements on its track line. City of  
3 Auburn, 154 F.3d at 1027-28, 1030-31. "[C]ongressional  
4 intent is clear, and the preemption of rail activity is a  
5 valid exercise of congressional power under the Commerce  
6 Clause." Id. at 1031; see also Ga. Pub. Serv. Comm'n, 944  
7 F. Supp. at 1580-82.

8 The Transportation Board has likewise ruled that "state  
9 and local permitting or preclearance requirements (including  
10 environmental requirements) are preempted because by their  
11 nature they unduly interfere with interstate commerce."  
12 Joint Petition for and Declaratory Order--Boston and Maine  
13 Corp. and Town of Ayer, MA, STB Finance Docket No. 33971,  
14 2001 WL 458685, at \*5 (S.T.B. Apr. 30, 2001), aff'd, Boston  
15 & Maine Corp. v. Town of Ayer, 191 F. Supp. 2d 257 (D. Mass.  
16 2002) (affirming the Transportation Board's determination  
17 that town's pre-construction permit requirement was  
18 preempted by the Termination Act); see also Green Mountain  
19 R.R. Corp., Petition for Declaratory Order, STB Finance  
20 Docket No. 34052, 2002 WL 1058001 (S.T.B. May 24, 2002). As  
21 the agency authorized by Congress to administer the  
22 Termination Act, the Transportation Board is "uniquely

1 qualified to determine whether state law . . . should be  
2 preempted'” by the Termination Act.<sup>2</sup> Ga. Pub. Serv. Comm'n,  
3 944 F. Supp. at 1584 (quoting Medtronic, 518 U.S. at 496).

4 Like the regulations and ordinances consistently struck  
5 down by federal courts and by the Transportation Board, Act  
6 250 mandates a pre-construction permit. Act 250's pre-  
7 construction permit requirement is preempted for two  
8 reasons: (i) it “unduly interfere[s] with interstate  
9 commerce by giving the local body the ability to deny the  
10 carrier the right to construct facilities or conduct  
11 operations,” Town of Ayer, STB Finance Docket No. 33971,  
12 2001 WL 458685, at \*5; and (ii) it can be time-consuming,  
13 allowing a local body to delay construction of railroad  
14 facilities almost indefinitely. Green Mountain R.R. Corp.,  
15 2003 U.S. Dist. LEXIS 23774, at \*13.

16 Nevertheless, as the district court observed, “not all  
17 state and local regulations are preempted [by the  
18 Termination Act]; local bodies retain certain police powers

---

<sup>2</sup> Whether the Transportation Board is entitled to deference under Chevron U.S.A., Inc. v. Natural Res. Def. Council, Inc., 467 U.S. 837, 843-44 (1984) is not material to the Court's decision. We therefore decline to reach the issue.

1    which protect public health and safety.” Id. It therefore  
2    appears that states and towns may exercise traditional  
3    police powers over the development of railroad property, at  
4    least to the extent that the regulations protect public  
5    health and safety, are settled and defined, can be obeyed  
6    with reasonable certainty, entail no extended or open-ended  
7    delays, and can be approved (or rejected) without the  
8    exercise of discretion on subjective questions. Electrical,  
9    plumbing and fire codes, direct environmental regulations  
10   enacted for the protection of the public health and safety,  
11   and other generally applicable, non-discriminatory  
12   regulations and permit requirements would seem to withstand  
13   preemption. Cf. Vill. of Ridgefield Park v. New York,  
14   Susquehanna & W. Ry. Corp., 750 A.2d 57, 64 (N.J. 2000)  
15   (noting the Transportation Board’s position that: (1) “while  
16   state and local government entities . . . retain certain  
17   police powers and may apply non-discriminatory regulation to  
18   protect public health and safety, their actions must not  
19   have the effect of foreclosing or restricting the railroad’s  
20   ability to conduct its operations or otherwise unreasonably  
21   burdening interstate commerce”; and (2) “railroads are  
22   exempt from the traditional permitting process but not . . .

1 from most other generally applicable laws”).

2 The legislative history of the Termination Act supports  
3 this approach: “Although States retain the police powers  
4 reserved by the Constitution, the Federal scheme of economic  
5 regulation and deregulation is intended to address and  
6 encompass all such regulation and to be completely  
7 exclusive.” See H.R. Rep. No. 104-311, at 96 (1995),  
8 reprinted in 1995 U.S.C.C.A.N. 793, 808. We need not draw a  
9 line that divides local regulations between those that are  
10 preempted and those that are not, because in this case  
11 preemption is clear: the railroad is restrained from  
12 development until a permit is issued; the requirements for  
13 the permit are not set forth in any schedule or regulation  
14 that the railroad can consult in order to assure compliance;  
15 and the issuance of the permit awaits and depends upon the  
16 discretionary rulings of a state or local agency.

### 18 III

19 The State’s primary appellate argument is that Act 250  
20 cannot be preempted on its face unless there is “no possible  
21 set of conditions that [the permitting authority] could  
22 place on its permit that would not conflict with federal

1 law." See Cal. Coastal Comm'n v. Granite Rock Co., 480 U.S.  
2 572, 580 (1987) (applying facial challenge standard in a  
3 statutory preemption case). We disagree. No doubt, there  
4 could be permit applications affecting railroad facilities  
5 that could be promptly approved without the slightest  
6 imposition on rail operations. However, what is preempted  
7 here is the permitting process itself, not the length or  
8 outcome of that process in particular cases. Cf. Chamber of  
9 Commerce v. Lockyer, 364 F.3d 1154, 1169 (9th Cir. 2004)  
10 (noting that in certain situations federal law preempts "the  
11 act of regulation itself, not the effect of the state  
12 regulation in a specific factual situation"). California  
13 Coastal Commission is easily distinguished on that basis, as  
14 well as on the absence of a preemption provision.<sup>3</sup>

---

<sup>3</sup> In California Coastal Commission, a mining company sought to enjoin a state agency from requiring the company to obtain a permit to mine on federal land. The Supreme Court ruled that in the federal mining statutes, "Congress specifically disclaimed any intention to pre-empt pre-existing state authority" and that the federal mining statute "does not automatically pre-empt all state regulation of activities on federal lands." 480 U.S. at 593. The federal mining statutes required that land-use plans of the federal agency charged with administering the federal mining statutes "provide for compliance with" existing state and federal environmental laws. *Id.* at 587 (internal quotation marks omitted). Because the mining company sought injunctive relief "before discovering what conditions the Coastal Commission would have placed on the permit," the Court concluded that the mining company's "case

1 "The facial/as-applied distinction would be relevant  
2 only if we might find some applications of the statute  
3 preempted and others not. . . . [W]here a state statute is  
4 in direct conflict" with a federal statute "or one of its  
5 processes," the "focus is the act of regulation itself, not  
6 the effect of the state regulation in a specific factual  
7 situation." Lockyer, 364 F.3d at 1169.

8  
9 **IV**

10 The State argues that Act 250 withstands preemption

---

must stand or fall on the question whether any possible set of conditions attached to the Coastal Commission's permit requirement would be pre-empted." *Id.* at 588.

Vermont failed to raise explicitly this facial preemption argument with the district court. As a result, the district court's opinion does not discuss California Coastal Commission. Generally, we do not consider an issue raised for the first time on appeal. See *Silverman v. Mut. Benefit Life Ins. Co.*, 138 F.3d 98, 103 (2d Cir. 1998). However, Vermont points out that, although it never cited to California Coastal Commission in its submissions to the district court, it preserved this issue for appellate review by arguing, in its August 2001 reply to Green Mountain's opposition to its motion to dismiss, that to succeed on its facial preemption claim, Green Mountain was obligated to show "that there are no circumstances under which Act 250 could be found constitutional," and did not press the argument thereafter because it believed that the district court adopted the State's position on facial preemption when it stated, granting in part the State's motion to dismiss: "to the extent the [State] ask[s] the Court to dismiss Green Mountain's claim that the [Termination Act] preempts Act 250 under all circumstances, the motion is granted."

1 because it is an environmental, rather than economic,  
2 regulation. The distinction is not useful. "[I]f local  
3 authorities have the ability to impose 'environmental'  
4 permitting regulations on the railroad, such power will in  
5 fact amount to 'economic regulation' if the carrier is  
6 prevented from constructing, acquiring, operating,  
7 abandoning, or discontinuing a line." City of Auburn, 154  
8 F.3d at 1031. Green Mountain serves industries that rely on  
9 trucks to transport goods from the rail site for processing;  
10 so the proposed transloading and storage facilities are  
11 integral to the railroad's operation and are easily  
12 encompassed within the Transportation Board's exclusive  
13 jurisdiction over "rail transportation." Notwithstanding  
14 the environmental goals of the legislation, Act 250's  
15 permitting process "necessarily interfere[s]" with Green  
16 Mountain's "ability to construct facilities and conduct  
17 economic activities." Green Mountain R.R. Corp., 2003 U.S.  
18 Dist. LEXIS 23774, at \*13.

19  
20 **V**

21 The State argues that Ace Auto Body & Towing, Ltd. v.  
22 City of New York, 171 F.3d 765 (2d Cir. 1999), compels a

1 different conclusion. In Ace Auto Body, this Court held  
2 that the section of the Termination Act relating to motor  
3 carrier operations (49 U.S.C. § 14501) did not preempt New  
4 York's police power to suppress the practice of "chasing,"  
5 whereby tow trucks compete for business by racing ("often  
6 recklessly") to accidents broadcast on police radio  
7 frequencies. Ace Auto Body, 171 F.3d at 769, 779. The  
8 State's reliance on Ace Auto Body is misplaced. The federal  
9 preemption language at issue in that case provides that a  
10 state or municipality "may not enact or enforce a law . . .  
11 related to a price, route, or service of any motor carrier .  
12 . . with respect to the transportation of property." Id. at  
13 770 (quoting 49 U.S.C. § 14501(c)(1)). The Court held that  
14 the "related to" phrase focused the preemption on economic  
15 regulations and reflected congressional intent to leave the  
16 state's historic police powers undisturbed where "only  
17 incidental economic burdens can be discerned." Id. at 774.  
18 We concluded that the chasing regulations were "sufficiently  
19 safety-oriented" while having no more than an incidental  
20 economic effect on the industry. Id.

21 In contrast to the federal statute at issue in Ace Auto  
22 Body, the plain language of Section 10501 reflects clear

1 congressional intent to preempt state and local regulation  
2 of integral rail facilities. "It is difficult to imagine a  
3 broader statement of Congress's intent to preempt state  
4 regulatory authority over railroad operations." Ga. Pub.  
5 Serv. Comm'n, 944 F. Supp. at 1581 (holding that the  
6 Termination Act preempted state regulation of railroad  
7 agency closing). We therefore need not conduct a fact-based  
8 inquiry weighing the economic impact of Act 250's permitting  
9 process upon Green Mountain; based on the facts before the  
10 Court, the State's effort to regulate rail transportation  
11 through the Act 250 pre-permitting process is necessarily  
12 preempted by the Termination Act.

#### 14 **CONCLUSION**

15 For the foregoing reasons, we affirm the judgment of  
16 the district court.
